5. Waste Minimization Statement**Efforts Undertaken:**

Xstrata Recycling has been involved in the recovery of precious metals for over 30 years. Our principle mission continues to be the acquisition of feedstock for Xstrata's Horne Division primary copper smelter, located in Rouyn-Xstrata, Quebec.

Xstrata Recycling has an active waste minimization program to reduce the amount of wastes sent to TSDF's for treatment and disposal within the United States.

No practical alternative to the use of the air pollution control equipment which generates baghouse waste has been identified.

Results Achieved:

The quantities of waste shipped by Xstrata Recycling are variable since some materials were generated off-site by third parties, and others are dependent on infrequent maintenance activities.

6. **Certification**
